Annex A3: Codebook

Study

Identifier of the study based on author surnames and year.

Year

Year of the publication. In some cases, the print publication is after the registered year (online version in that case).

Conceptions

Short enumeration of the studied conceptions of democracy.

Empirical Scope

Short description of the number of countries included in a study and their geographic scope.

Summary of measures and measurement strategy

Brief summary of the measures used and the chosen measurement approach.

A01 Liberal democracy

Is a liberal-democratic conception predefined on the conceptual level?

Also includes liberal democracy as representative democracy (as opposed to other models, such as direct democracy or stealth democracy), electoral/procedural democracy, liberalism, and pluralism. If a study further distinguishes between a liberal and an electoral dimension of liberal democracy, this is counted as one conception falling under A01.

1 = yes

0 = no

A02 Substantive democracy

Is a substantive conception of democracy predefined on the conceptual level?

Includes conceptions that refer to outcomes of governing, such as economic welfare and economic equality and sees democracy as instrumental for these outcomes.

1 = yes

0 = no

A03 Direct democracy

Is a direct democratic conception of democracy predefined on the conceptual level?
Includes conceptions that refer to direct participation of citizens in political decision-making.

1 = yes

0 = no

A04 Authoritarian democracy

Is a conception of democracy with authoritarian traits predefined on the conceptual level?

1 = yes

0 = no

A05 Stealth / Expert democracy

Is a stealth-democratic or similarly elitist / expert democratic conception predefined on the conceptual level?

1 = yes

0 = no

A06 Populist conception of democracy

Is a populist attitude that expresses a preference for organizing democratic politics along populist ideas predefined on the conceptual level?

1 = yes

0 = no

A07 None

Coded yes if no conception of democracy is predefined.

1 = yes

0 = no

preference dimensions” even though the indicators themselves yield separate associations with democracy.

The study by Shi (2008) uses an open-ended question to probe what citizens associate with democracy and additionally uses six items to examine how much citizens endorse liberalism. As the main analysis capturing different conceptions of democracy is based on the open-ended question, the study is categorized as (2) “Reported associations with democracy”.

C01 # countries

The number of countries studied.

C02 # countries coded

Categorized version of C01.

C03 Empirical scope (including C03a to C03e)

Coverage of world regions based on UN category scheme: Africa, Americas, Asia, Europa, Oceania.

C04 Scaling techniques used

Does the study use scaling methods, such as principal component analysis, exploratory factor analysis, confirmatory factor analysis, item response theory model, Mokken scaling.

1 = yes

0 = no

C05 Which scaling technique

Specification of C03: Which scaling technique does the study use?

C06 Combinatorial approach

Does the study combine items or generated dimension into types for which these attributes are jointly necessary? This step can be data-driven, using e.g. cluster analysis or latent class analysis, or entirely guided by theory (“conceptually guided”).

1 = yes

0 = no

C07 Which combinatorial approach

Specification of C05: Which combinatorial technique does the study use?

C08 Main findings on prevalence of attitudinal constructs

Short description of the main descriptive evidence regarding the prevalence of the examined conceptions of democracy.

C09 Data sources

Origin of survey data (names of data sources/data sets, including custom surveys).

Annex A4: Trends in the coverage of concepts

	1990s	2000s	2010s
Liberal democracy	2 (40%)	7 (29%)	33 (25%)
Substantive democracy	2 (40%)	3 (13%)	13 (10%)
Direct democracy	0 (0%)	6 (25%)	21 (16%)
Authoritarian democracy	0 (0%)	1 (4%)	6 (5%)
Stealth democracy	0 (0%)	2 (8%)	20 (16%)
Populist democracy	0 (0%)	0 (0%)	26 (20%)
None predefined	1 (20%)	5 (21%)	11 (8%)
Number of studies	3	16	79
Concepts per study	1.7	1.5	1.6

Annex A5: Geographic scope

Notes: Categories are based on the United Nations area codes. Frequency represents the number of studies in which a given region is covered.

Annex A6: Number of countries covered

Annex A7: Overview of data sources used in the reviewed studies

Survey	Frequency
International Social Survey Programme	2
European Social Survey	8
World/European Values Survey	8
Barometer series (Afrobarometer, Arab Barometer, Asia Barometer, Latinobarómetro, East Asia Barometer)	19
Election/referendum studies	19
Custom survey	38
Other	11

Annex A9: Ratio of items with unique ID to all items by construct

Construct	# Studies covering concept	# of items w. unique ID	# of items with redundancies	Ratio # unique / # with redundancies
Liberal democracy	42	59	119	0.5
Direct democracy	27	30	47	0.6
Substantive democracy	26	6	18	0.3
Populist attitude/Populist democracy	22	73	209	0.3
Stealth democracy	18	12	69	0.2
Authoritarian democracy	8	3	13	0.2
None predefined	17	104	148	0.8
Total (in all 98 studies)	98	263	660	0.4

Notes: A lower ratio means a higher concentration on a few items that are used in many studies.

Annex A10: Items with overlap between conceptions of democracy

Item ID	Item	Constructs
1	Elected officials would help the country more if they would stop talking and just take action on important problems	Stealth/elite democracy; populist democracy
2	What people call 'compromise' in politics is really just selling out one's principles	Stealth/elite democracy; populist democracy
17	Important national issues should more often be decided in a referendum.	Direct democracy; populist democracy
19	Citizens have the final say on the most important political issues by voting on them directly in referendums	Direct democracy; liberal democracy; populist democracy
76	People can change the laws in referendums	Direct democracy; liberal democracy
80	The economy is prospering	Substantive democracy; populist democracy
81	Criminals are severely punished	Substantive democracy; populist democracy

Annex A11: Trends in the operationalization and aggregation methods

		1990s	2000s	2010s
Separate associations with democracy		1	8	6
Separate preference dimensions		2	6	57
Preference trade-offs		0	1	7
Distinctive preference types		0	1	9
Scaling method	yes	2	2	42
	no	1	14	37
Combinatorial approach	yes	0	1	10
	no	3	15	69
Both	yes	0	0	4
	no	3	16	75
Number of studies		3	16	79
